

Objectives Sheet

CLL 011 - Performance Based Logistics (PBL)

Course Learning/Performance Objectives followed by enabling learning objectives

CLL 011.U01.01	TLO 1: Recognize the basic tenets of PBL.
CLL 011.U01.01.01	Identify the basic tenets of Performance Based Logistics (PBL) and its role in Life Cycle Management
CLL 011.U01.02	Translate the warfighter's mission requirements into performance and support metrics
CLL 011.U01.02.01	Recognize that the first step in an effective PBL implementation effort is to translate Warfighter mission requirements into performance and support metrics.
CLL 011.U01.03	Build the Product Support Management (PSM) Integrated Product Team (IPT)
CLL 011.U01.03.01	Select the method the Product Support Management ((PSM) Integrated Product Team (IPT) should use
CLL 011.U01.04	Describe baselining goals and methods.
CLL 011.U01.04.01	Establish system performance and cost baselines
CLL 011.U01.05	Recognize that the Product Support Management (PSM) Integrated Product Team (IPT) typically includes lower level metrics
CLL 011.U01.05.01	Describe both the top level metrics and the associated lower level metrics a PBL strategy should try to optimize
CLL 011.U01.06	Recognize that the PSM IPT uses the Business Case Analysis (BCA) to arrive at the optimum support solution
CLL 011.U01.06.01	Recognize that the PSM IPT uses the Business Case Analysis (BCA) to arrive at the optimum support solution
CLL 011.U01.07	Recognize the key factors the PSM IPT uses to execute a "Best Value" product support analysis
CLL 011.U01.07.01	Recognize the key factors the PSM IPT uses to execute a "Best Value" product support analysis
CLL 011.U01.08	Recognize Product Support Methods
CLL 011.U01.08.01	Recognize the Product Support Methods of Transactional and Performance-Based support
CLL 011.U01.09	Recognize key criteria to select the Product Support Integrators (PSI)
CLL 011.U01.09.01	Identify key criteria the Product Support Management (PSM) Integrated Product Team uses to select the Product Support Integrators (PSI)
CLL 011.U01.10	Recognize the most common statutes, policies and guidelines that must be considered when developing the optimal workload allocation strategy
CLL 011.U01.10.01	Identify the most common statutes, policies and guidelines the PSM IPT considers when developing the optimal workload allocation strategy
CLL 011.U01.11	Identify various PBL funding approaches and funding types, to include both appropriated and non-appropriated funds
CLL 011.U01.11.01	Recognize the crucial link between the warfighter's requirements and the subsequent Product Support Arrangement parameters
CLL 011.U01.12	Recognize the crucial link between the Warfighter's performance requirements and subsequent PSAs
CLL 011.U01.12.01	Identify the crucial link between the Warfighter's performance requirements and subsequent PSAs
CLL 011.U01.13	Recognize the 12th Step of the Product Support Implementation Model: Implement and Assess
CLL 011.U01.13.01	Identify methods to continually assess the support providers' performance, including the Quality Assurance Surveillance Plan (QASP).
