## CMC 150 - Introduction to Terminations

170505

*Course Learning/Performance Objectives followed by its enabling learning objectives on separate lines if specified.*

<b>1</b>	<b>Given a scenario, determine the Government’s authority to terminate contracts for default or convenience and the reasons for issuing a termination notice.</b>
	Determine the authority of the Contracting Officer (CO) to execute contract terminations.
	Recall the types of contract terminations.
	Determine the steps involved in the Government contract termination process prior to settlement.
<b>2</b>	<b>Given a contract terminations settlement scenario, identify how the TCO will prepare for a contract settlement.</b>
	Sequence the contract settlement steps as related to the contract settlement process.
	Identify contract settlement principles supporting the purpose of contract settlement.
	Determine the allowability of settlement expenses.
	Determine the role authority and responsibilities of the Terminations Contracting Officer (TCO) during contract settlement procedures.
	Given a scenario, identify key discussion points of the initial conference.
	Determine what is needed to prepare for settlements.
	Identify the key factors involved in determining the initial cost estimate for a contract termination prior to negotiating a settlement agreement.
Identify steps of the Plant Clearance process and corresponding roles related to contract termination.	
<b>3</b>	<b>Given a scenario, create a settlement proposal to realize the maximum reasonable return.</b>
	Determine the information to be included in the settlement proposal.
	Complete the most common Standard Forms (SFs) used for the submission of settlements proposals.
	Calculate the adjustment for loss for both inventory and cost basis contracts.
	Calculate partial payment as related to contract terminations.
<b>4</b>	<b>Given a contract settlement scenario, prepare a Settlement Negotiation Memorandum (SNM).</b>
	Identify a claim versus a dispute in regards to contract terminations.
	Given a scenario, establish prenegotiation objectives.
	Classify types and methods of contract settlements agreements.
	Given a scenario, select the correct close docket procedures during final settlements of terminated contracts.
