

Objectives Sheet

LOG 201 - Product Support Strategy Development, Part B

Course Learning/Performance Objectives followed by enabling learning objectives

LOG 201.U01.01	Analyze key factors of a Product Support Strategy when given a Life Cycle Sustainment Plan (LCSP) outline, program, policy, and framework documents.
LOG 201.U01.01.01	Identify Warfighter requirements when given material from previous courses, program, policy, and framework documents.
LOG 201.U01.01.02	Analyze the effect of Warfighter requirements on the Product Support Strategy when given material from previous courses , program, policy, and framework documents.
LOG 201.U01.01.03	Describe boundaries, constraints, opportunities, and design considerations affecting the life cycle logistician and Product Support Strategy when given program, policy, and framework documents.
LOG 201.U01.01.04	Identify the Strike Talon Concept of Operations (CONOPs) when given program documents.
LOG 201.U01.01.05	Analyze the effect of the CONOPs on the Product Support Strategy when given the Integrated Product Support Elements (IPSEs) and a program's Concept of Operations (CONOPs).
LOG 201.U01.01.06	Identify the requirements (KPPs, KSAs, and PSAs) for the Strike Talon Program when given program, policy, and framework documents.
LOG 201.U01.01.07	Apply requirements, boundaries, constraints and opportunities to the program's Product Support Strategy when given program, policy, and framework documents.
LOG 201.U01.01.08	Document the Product Support Strategy when given a Life Cycle Sustainment Plan (LCSP) outline, program, policy, and framework documents.
LOG 201.U02.01	Differentiate key elements of a Life Cycle Sustainment Plan when given a Life Cycle Sustainment Plan (LCSP) outline, program, policy, and framework documents.
LOG 201.U02.01.01	Analyze the logistics risk for selected components when given technology readiness level definitions, Strike Talon Prognostics Health Management (PHM) subsystem Commercial off-the-Shelf (COTS) component data, and the Integrated Product Support Elements.
LOG 201.U02.01.02	Apply best practice risk management strategies when given information on COTS components, market research, the Integrated Product Support Elements, and logistics risk data.
LOG 201.U02.01.03	Describe the process of using test data for reducing logistics risk when given a Life Cycle Sustainment Plan (LCSP) outline, program, policy, and framework documents.
LOG 201.U02.01.04	Update the LCSP when given a Life Cycle Sustainment Plan (LCSP) outline, program, policy and framework documents, and risk evaluation.
LOG 201.U02.01.05	Define Maintenance Concept when given class materials, policy, and framework
LOG 201.U02.01.06	Describe the Strike Talon Maintenance Concept when given program, policy, and framework documents.
LOG 201.U02.01.07	Summarize a Maintenance Plan when given information on supportability analysis, program, policy, and framework documents, and the Strike Talon Maintenance Concept.
LOG 201.U02.01.08	Analyze key factors of the Product Support Strategy and Life Cycle Sustainment Plan when given a Maintenance Plan and the IPS elements.
LOG 201.U03.01	Analyze key factors of a Life Cycle Sustainment Plan when given a Life Cycle Sustainment Plan (LCSP) outline, program, policy, and framework documents.
LOG 201.U03.01.01	Define reliability growth when given background information, policies and instruction material.
LOG 201.U03.01.02	Explain the affect of reliability growth on Product Support Planning when given program, policy, and framework documents.
LOG 201.U03.01.03	Analyze appropriate courses of action to improve Product Support when given program, policy and framework documents, Integrated Product Support Elements, and reliability data.
LOG 201.U03.01.04	Update the Strike Talon Program's LCSP when given program, policy and framework documents, Integrated Product Support Elements, and reliability data.
LOG 201.U03.01.05	Describe how reliability affects system affordability when given program, policy, and framework documents.
LOG 201.U03.01.06	Articulate how reliability affects Operating & Support (O&S) Costs when given policy and framework documents.
LOG 201.U03.01.07	Describe how O&S costs are documented when given a Life Cycle Sustainment Plan (LCSP) outline, program, policy, and framework documents.
LOG 201.U04.01	Create a tailored contractual Statement of Work applicable to the appropriate acquisition life-cycle phase that provide clear, concise, consistent , requirements to the contractor
LOG 201.U04.01.01	Describe the information needed for building a Sustainment Quad Chart when given a Life Cycle Sustainment Plan (LCSP) outline, program, policy, and program data.
LOG 201.U04.01.02	Model a Strike Talon Sustainment Quad Chart when given a Life Cycle Sustainment Plan (LCSP) outline, program, policy and program data, through facilitated class discussion.
LOG 201.U05.01	Outline a Product Support Strategy when Given a Life Cycle Sustainment Plan (LCSP) outline, program, policy, and framework documents.
LOG 201.U05.01.01	Analyze the effect of Program changes to the Product Support Strategy when given a Product Support Strategy , Life Cycle Sustainment Plan (LCSP), policy, framework documents, and a case scenario.
LOG 201.U05.01.02	Explain the effect of Program changes to the Product Support Strategy when Given a Product Support Strategy , Life Cycle Sustainment Plan (LCSP), policy, framework documents, and a case scenario.
